

Section 401 Water Quality Certification Public Notices

The Central Coast Water Board is currently reviewing applications for the following project for certification under Section 401 of the Clean Water Act. We encourage public comments on the proposed work, which will be considered in the decision. You may submit comments in writing on any of these projects to:

Central Coast Regional Water Quality Control Board
895 Aerovista Place, Suite 101
San Luis Obispo, CA 93401
Attention: 401 Coordinator

Project Applicant	Karen Miner – California Department of Fish and Game
Applicant's Agent	John H. Davis IV – URS Corporation
Project Name	Western Goleta Slough Wetlands Restoration
Receiving Water	Goleta Slough
City/County	Goleta/Santa Barbara
Public Notice	9/4/08 to 9/25/08
Project Description	<p>The purpose of this project is to restore wetlands within Goleta Slough that were lost as part of residential development in the City of Goleta.</p>

The project activities include: grading, soil removal, and headwall installation to create a swale to aid in the establishment of an upland-to-wetland transition. In addition, an area of approximately 3.2 acres would be excavated, graded, and revegetated with suitable native wetland plant species. Existing debris piles in the East Slough Basin will be excavated and the contours of the basin will match those of the wetlands on the north side to create non-tidal transitional wetlands. Water control structures with removable stop logs will be installed on the upstream sides of two existing steel pipe culverts to control water in three on-site basins. Project proposes to enhance approximately 3.7 acres of wetlands and create approximately 4.0 acres of new wetlands.

No mitigations were proposed for this project.

A Mitigated Negative Declaration was approved for this project.
